

**Physics 1401a and 1402b
Physics for Engineering Students
Course Information: 2010/2011**

Note: This Course Information sheet is a living document. Check for updates to this information on the course website.

1. Course Description

A calculus-based course which discusses kinematics, Newton's laws of motion, work, energy, linear momentum, simple harmonic motion, electrostatics, d.c. circuits, magnetic fields and electromagnetic induction

Antirequisite(s): Physics 1021, 1028A/B, 1301A/B, 1501A/B, the former Physics 1020, 1024, 1026.

Prerequisite(s): Grade 12U (SPH4U) Physics; Grade 12U Calculus and Vectors (MCV4U) or the former Grade 12U Advanced Functions and Introductory Calculus (MCB4U) or Mathematics 0110A/B.

Corequisite(s): Applied Mathematics 1413.

Pre-or Corequisite(s):

Unless you have either the requisites for this course or written special permission from your Dean to enroll in it, you will be removed from this course and it will be deleted from your record. This decision may not be appealed. You will receive no adjustment to your fees in the event that you are dropped from a course for failing to have the necessary prerequisites

Formal Time-commitment: 2 lecture hours, 3 laboratory hours, 2 tutorial hours. Physics 1401A: 0.5 course. Physics 1402B: 0.5 course Extra commitment will be required in your own time.

Note: Unless you have either the requisites for this course or written special permission from your Dean to enroll in it, you will be removed from this course and it will be deleted from your record. This decision may not be appealed. You will receive no adjustment to your fees in the event that you are dropped from a course for failing to have the necessary prerequisites.

2. Timetable

Physics 1401A (FALL TERM)

	Section 1	Section 2
Lecture Times:	Tue, Thu 8:30 – 9:20 am WSC 55	Mon, Wed 8:30 – 9:20 am WSC 55
Web Site:	http://webct.uwo.ca ** You will need this web site for checking marks, obtaining lecture material, doing sample problems and obtaining solutions.	
Instructors:	Prof. Giovanni Fanchini; Prof. Lyudmila Goncharova	
Emails (please use this ONLY if you cannot access WebCT mail), phone and office	Dr. Fanchini: gfanchin@uwo.ca , X 86238, PAB 112 Dr. Goncharova: lgonchar@uwo.ca , X81558, PAB 202B/A	

Physics 1402B (WINTER TERM)

	Section 1	Section 2
Lecture Times:	Tue, Thu 8:30 – 9:20 am WSC 55	Mon, Wed 8:30 – 9:20 am WSC 55
Web Site:	http://webct.uwo.ca ** You will need this web site for checking marks, obtaining lecture material, doing sample problems and obtaining solutions.	
Instructor	Prof. W.K. Hocking	Prof. P. Brown
Emails (please use this ONLY if you cannot access WebCT mail)	whocking@uwo.ca	pbrown@uwo.ca
Phone	X83652	X86458
Office	PAB 301	PAB 238

3. Course Materials

The following course materials can be purchased at the UWO Bookstore - get the package specifically listed for Physics 1401A/1402B:

Textbook: Fundamentals of Physics, 9th edition, Parts 1 and 3, plus Chapter 15, by Walker et al. *Earlier versions may be used, but it is the student's responsibility to adjust for page*

changes, question number changes and other alterations between editions. References to the text and questions in lectures will be in regard to the 9th edition only.

Wiley plus package: Is not mandatory but strongly recommended.

Lab Manual: This year we have two lab packages: (1) 2010-2011 Physics 1301A/1401A/1501A Laboratory Manual; and (2) 2010-2011 Physics 1302B/1402B/1502B Laboratory Manual. Be sure to buy the correct packages, as they are not refundable.

Personal Response Unit: Interwrite PRS “clicker” (note that old-style clickers cannot be used – you MUST purchase the Interwrite one).
Personal Response Units (or “clickers”) will be used to evaluate class participation. Clickers and enrolment codes are available at the UWO Bookstore. Note that you only need one clicker (and enrolment code) for all courses using clickers at UWO.

Calculator: *Sharp EL-510RB Scientific Calculator.*
This is the only calculator allowed in tests or exams.

In addition, on-line materials, including lecture notes, are available from the course web site.

4. Course Content

The course content is outlined in the following tables:

Physics 1401A (Fall)		
Chap.	Sections	Topic
2	All	Motion in 1D
3	All	Vectors
4	All	Motion in 2D & 3D
5	All	Force & Motion I
6	All	Force & Motion II
7	All	Kinetic Work & Energy
8	All except 6	Potential Energy & Conservation of energy
9	All except 12	Centre of Mass & Linear Momentum
10	All	Rotation
11	1-3, 6-11	Torque & Angular Momentum
15	All	Oscillations

Physics 1402B (Winter)		
Chap.	Sections	Topic
21	All	Electric Charge
22	1-5, 8-9	Electric Fields
23	All	Gauss' Law
24	All except 9	Electric Potential
25	1-5	Capacitance
26	All	Current and Resistance
27	All	Circuits
28	All except 7	Magnetic Fields
29	All	Magnetic Fields due to Currents
30	1-8	Induction and Inductance

5. Evaluation

Your final grade in each term will be derived approximately according to:

Physics 1401A (Fall)	
Laboratory	20%
Tutorial Tests (4/5)	20%
Participation	5%
Final Examination	55%

Physics 1402B (Winter)	
Laboratory	20%
Tutorial Tests (4/5)	20%
Participation	5%
Final Examination	55%

The Final Examination for Phys 1401A (December) will cover the material discussed in class during the fall term. The Final Examination for Phys 1402B will primarily cover the material discussed in class during the winter term, but certain fundamental concepts from fall term (e.g. Newton's laws, distance-velocity-acceleration relations, etc.) may be necessary to complete the final exam.

6. Laboratories

Failing the laboratory component means a failing grade in this course regardless of your performance on the tests and examinations.

The laboratories will be held in the new Material Sciences Addition (MSA), rooms M2220, M2230, M2240 and M2250. The Material Sciences Addition is adjacent the Chemistry Building, and can be accessed through there. **Dr. K. Kaluarachchi (MSA room M2203)** is the Director/Supervisor in charge of the laboratory. Direct all laboratory questions to her (email kanthi@uwo.ca or telephone to 519-661-2111 x86446), not to your instructor. Your instructor is NOT involved in the day-to-day running of the labs.

Information on the laboratory is posted on the lab WebCT <http://webct.uwo.ca/> and lab site:

<http://www.physics.uwo.ca/ugrad/labyr1/index.htm>

Laboratory Orientation Lecture

A laboratory orientation lecture will be posted on the lab WebCT site by the first week of September. You must visit the web site and familiarize yourself with the contents of this lecture before attending your first lab.

Laboratory Schedules

Each Physics 1401A/1402B lab section — 003, 004 and 005 — is divided into three laboratory subsections A, B and C, which meet on alternate weeks throughout the year. The laboratory timetables for these lab sections are posted at the above lab WebCT site. The timetables are also posted on the second floor of the Material Sciences Addition.

Laboratory subsection assignments will be posted on the lab WebCT site by student last name. You must find your correct lab section, lab subsection and the correct laboratory timetable before attending the first lab. Please attend the correct lab class on the correct date as we do not give permission to attend lab classes outside your laboratory schedule.

If you have difficulty following the timetable scheduled for your lab sub-section, please contact the laboratory director/supervisor, Dr. K. Kaluarachchi (contact details given above).

If you have taken the course previously and want to know if you have to repeat the labs, contact Dr. Kaluarachchi as soon as possible.

Fall term (1401A): Final mark for the labs will be the average of the best 3 lab marks plus lab homework assignment. Students may miss 1 lab without a penalty. Student must attend and to pass at least 3 labs.

Winter term (1402B): Final mark for the labs will be the average of the best 5 lab marks. Students may miss 1 lab without a penalty. Student must attend at least 3 labs. If 2 labs are missed, final mark will be calculated including zero for one of the missed labs.

In order to pass the course, a student must obtain a passing grade in the laboratory.

7. Tutorials and Tutorial Tests

In the weeks alternating with the laboratory, there will be tutorials covering topics discussed in class during the preceding two weeks. At the end of the tutorial period (except the first tutorial) there will be a 45 minute tutorial test. A total of five tutorial tests will occur throughout each term. The tests consist of multiple choice problems and longer answer - type questions. You will receive a final mark based on the best four out of five of your tutorial tests. As a result of this policy, no makeups will be provided for these tests.

For the tutorial tests you will be divided into the same subsections as your lab subsections. You must write the tutorial test in the subsection you are assigned - no exceptions. The tutorial schedule, timing and material to be covered at each tutorial will be posted to the WebCT class site in advance of the test dates.

8. Participation

The Class Participation Grade will be evaluated using a “Classroom Response System,” in which students use Personal Response Units (commonly known as “clickers”) to register their responses to questions posed in class. A clicker is a small radiofrequency transmitter that resembles a TV remote. Students purchase their clicker in the bookstore and register it against their student number for use in all classes at UWO using this technology. In class, instructors can ask a variety of structured questions to which students may respond by pressing the appropriate button on their respective clickers. Individual responses are collected and displayed as a graph at the front of the room, and are saved for future analysis.

See the instructions at the presswestern.uwo.ca site for details of how to program your Western UserID into the unit and confirm that it is working properly Used clickers may also be available. It is very important that you use your UserID (which can be found from your email address as [userid@uwo.ca](mailto:user@uwo.ca)) and NOT your student number. Be sure to replace the batteries and don't forget to program them with your unique UserID. Students using their student number may receive a participation grade of zero.

Exclusivity: The only clickers that can be used from this class are the Interwrite PRS clickers. These are available from the Western Bookstore along with an enrolment code. (Although clickers may be obtained from alternate sources, your enrolment code must be purchased in the Western Bookstore). You only need one clicker and enrolment code for all of your courses in a given term. The older EInstruction clickers cannot be used.

Responsibility: It is your responsibility to ensure that your clicker is functioning properly. See the instructions in the box or the <http://presswestern.uwo.ca> site for details of how to program your Western UserID into the unit and confirm that it is working properly. If you have problems with your clicker, consult the ITS HelpDesk in the Services Building. Since all clickers on campus look identical, it may be best for you to customize yours in ways that make it identifiable to you. If you have to replace a lost or defective clicker during the term, please inform your instructor. Questions or comments regarding clicker use should be posted to the course WebCT Discussion Board.

Evaluation: The total participation grade is 10% for each term. The score you obtain is based on the number and accuracy of your clicker responses. It is your responsibility to verify that your clicker is operating correctly and that your responses are being recorded. Your clicker grade will be updated approximately weekly on the course WebCT site. A full 10% score in any one term can be achieved by obtaining 20 points in that term. Any lecture in which you register a response to at least half of the questions asked counts as 1 point, regardless of your answers. A lecture in which you answer any question correctly gives you a 0.1 point bonus, up to a maximum of 20 points per semester. It is thus possible to receive a 10% participation grade without answering a single question correctly if you attend at least 20 lectures.

Because your clicker use will become part of your academic record, it will be afforded the same degree of security, confidentiality and transparency that is customary for test marks, etc. You can review your clicker record through the appropriate link on the course web site. Any errors must be reported to your instructor within two weeks of their initial posting.

Although your instructors intend to invite clicker use in every lecture, it may be necessary (e.g., due to technical problems or instructor absence) to occasionally exclude their use.

Academic Integrity: Since clicker records are used to compute a portion of course grades, the use of a clicker other than your own is an academic offence. Possession of more than one clicker, or one registered to another student, in a lecture will be interpreted as intent to commit an academic offence. Penalties range from disabling the clicker codes for an extended period to formal disciplinary action.

9. Documentation for Medical or other serious emergencies

If you are unable to meet a course requirement due to illness or other serious circumstances, you must provide valid medical or other supporting documentation to the Dean's office as soon as possible and contact your instructor immediately. It is the student's responsibility to make alternative arrangements with their instructor once the accommodation has been approved and the instructor has been informed. In the event of a missed final exam, a "Recommendation of Special Examination" form must be obtained from the Dean's Office immediately.

For further information please see: <http://www.uwo.ca/univsec/handbook/appeals/medical.pdf>

A student requiring academic accommodation due to illness should use the Student Medical Certificate when visiting an off-campus medical facility or request a Records Release Form (located in the Dean's Office) for visits to Student Health Services.

The form can be found here: https://studentservices.uwo.ca/secure/medical_document.pdf

10. Final Examinations

Exam times will be posted on the course web site when available. Students who are making travel arrangements for the holidays are advised to book a travel date after the end of the examination period. **No makeup exams will be given to accommodate travel!**

No extra sheets, PDAs, advanced calculators, computers, cell phones, etc., may be accessible to you during exams.

Exams will consist of a combination of multiple-choice problems, designed to test conceptual understanding of topics covered in class, and numerical problems (which may consist of multiple parts), which test problem-solving abilities. Computer-marked multiple-choice tests and/or exams may be subject to submission for similarity review by software that will check for unusual coincidences in answer patterns that may indicate cheating.

Calculators: The **only** calculator that may be brought into an exam is the Sharp EL-510RB calculator, which is available from the UWO Bookstore. The only exception is any Sharp model EL-5xx (where xx is typically 00 or 10R). If you are in doubt about your calculator, show it to us before the examination

Accommodations for Religious Holidays

When scheduling unavoidably conflicts with religious holidays which (a) require an absence from the University or (b) prohibit or require certain activities (i.e., activities that would make it impossible for the student to satisfy the academic requirements scheduled on the day(s) involved), no student will be penalized for absence because of religious reasons, and alternative means will be sought for satisfying the academic requirements involved. It is the responsibility of such students to inform themselves concerning the work done in classes from which they are absent and to take appropriate action.

A student who, for either of the situations outlined in paragraph one above (a or b), is unable to write examinations and term tests on a Sabbath or Holy Day in a particular term shall give notice of this fact in writing to his or her Dean as early as possible but not later than November 15th for mid-year examinations and March 1st for final examinations, i.e., approximately two weeks after the posting of the mid-year and final examination schedule respectively. In the case of mid-term tests, such notification is to be given in writing to the instructor within 48 hours of the announcement of the date of the mid-term test. The instructor(s) (in the case of mid-term tests) and the dean (in the case of mid-year and Spring final examinations) will arrange for special examination(s) to be written at another time. In the case of mid-year and Spring final examinations, the accommodation must occur no later than one month after the end of the examination period involved. It is mandatory that students seeking accommodations under this policy give notification before the deadlines, and that the Faculty accommodate these requests.

For purposes of this policy the University has approved a list of dates which are recognized religious holidays which require members of those religions to be absent from the University; this list is updated annually and is available at <http://www.uwo.ca/equity/docs/mfcalendar.htm>.

11. Make-up Policy

a) Lab Marks. Grading policies for the laboratory are given in the Notes to Students in your lab manual package.

b) Tutorial Tests. As your mark is based on the best four out five tutorial tests, no make up tests will be given. Note that this schedule allows you to miss approximately 1 month of tutorials due to illness without penalty.

c) Participation Grades. Because a 10% participation grade for a single term can be achieved in as few as 18 lectures, no opportunity to make up missed lectures will be provided. It is your responsibility to verify that your clicker is operating correctly and that your responses are being recorded. Your clicker grade will be updated approximately weekly on the course WebCT Owl site.

d) Final Examination. The Department will provide one make-up test that may be written only with the permission of the Associate Dean, Faculty of Engineering. In accordance with Senate Policy, a Special Examination will be held within thirty days of the regular final examination for students who are unable to write the regular examination for medical or other documented reasons.

12. Tutorials and Help

In addition to the regularly scheduled tutorial periods, help is available in the "Resource Room" of the Material Sciences Addition. Times will be announced in class and on the class website. Tutorials will be given before the

mid-year exam and the final exam, without an associated tutorial test, to provide a more complete review of the semester's material.

13. Class Web Site

All on-line materials (lecture notes, tutorial material, access to interim grades, announcements, etc.) are available through the course web site. To access this site, you will need to go to <http://webct.uwo.ca> and log on using your UWO username and password. If you need information about setting up and using your account (or forwarding your mail from uwo.ca to other mail services), all the information you need is at the ITS web site, <http://www.uwo.ca/its/>. Some aspects of the web site require Adobe Acrobat Reader (5.0 or higher), which is available for free.

14. Cheating (Scholastic Offences)

Cheating

University policy states that cheating is a scholastic offence. The commission of a scholastic offence is attended by academic penalty, which may include expulsion from the program. If you are caught cheating, there will be no second warning. Possession or use of more than one clicker during a lecture will be considered cheating. Cheating includes having available any other electronic devices than a watch and the

Sharp calculator discussed previously during a test or exam. You may not have a cell phone accessible, even to use it as a calculator or watch. Complete information on the University policy on academic offenses can be found at <http://www.uwo.ca/univsec/handbook/>.

Plagiarism

Students must write their essays and assignments in their own words. Whenever students take an idea, or a passage from another author, they must acknowledge their debt both by using quotation marks where appropriate and by proper referencing such as footnotes or citations. Plagiarism is a major academic offence (see Scholastic Offence Policy in the Western Academic Calendar).

15. Classroom Conduct

Disruptive behaviour will not be tolerated in class (or the chat room). Please respect the rights of your classmates to benefit from the lecture by limiting your conversations to those essential to the class. Students who persist in loud or rude behaviour will be asked to leave and may have their clicker codes disabled for an extended period.

16. Complaints and Suggestions

If you have a concern about something, please let us know. We rely on your feedback. Please contact initially the person most directly concerned; this will usually be your instructor. If that is not satisfactory, or if there is

something more general bothering you, talk it over with the Chair of Undergraduate Affairs or the Physics & Astronomy Department Chair (for contact information see <http://www.physics.uwo.ca>).

17. Accessibility

Please contact the course instructors if you require material in an alternate format or for any other arrangements to make this course more accessible to you. You may also wish to contact Services for Students with Disabilities (SSD) at 661-2111 x 82147 for any specific question regarding an accommodation.

18. Contacting Us

The simplest way to contact us outside of lectures is by the "mail" function of the class WebCT Vista site (<http://webct.uwo.ca>). Please allow 2–3 working days for a response. We will not read or respond to emails from any source other than WebCT or addresses that do not end in "@uwo.ca"! Note in particular that emails sent from non-UWO accounts may be not answered, as they can be rejected as spam by our mail server.
